# RICH NEW CHUTE IN THE MAY DAY

Tintic Reports New Resource Cut on the Two Hundred Forty Level.

FULL FACE SHOWS SHIPPING ORES

Placed Into Shape for Great Era.

Word reached Salt Lake Thursday that an extremely fine strike of rich lead carbonate ore had been made upon the 240-foot level of the May Day ground, and at a portion of the property toward the Yankee possessions. It was stated that the entire face of the drift was in ore of splendid firstclass shipping grade, the extent as yet being unknown, as the same has just been broken into. Those who have seen the May Day during the past week or so state that there is ore in a half dozen different places through-

half dozen different places throughout the property, the new find being
one of many that encourages the stockholders in the conviction that the May
Day is one of the real mines of Tintic.
Another significant development has
been registered on the 400 foot level,
in that a large zone of dolomite lime
has been run into which is the matrix
of ore chutes, and another big body
is locked for at almost any shot
now. The management is rushing
through the connections between the
old May Day and the former Uncle
Sam Consolidated levels, so as to bring
out all ores via the Uncle Sam tunnel. Sam Consolidated levels, so as to bring out all ores via the Unele Sam tunnel. This method of disposing of the resources should cut down the cost of mining at least \$5 to the ton. Local stockholders are loud in their praise of Superintendent Griggs for the earnest manner in which he has attended to the company's affairs.

When the May Day is in correct trim for production, local circles think that the resources of the mine will permit one car a day to leave the property

that the resources of the mine will permit one car a day to leave the property for the market. There is a sufficient tomage of milling grades of rock in the property to last for at least five years at the present rate of treatment, and this milling ore is expected to meet all expenses incurred, so as to leave the better grades of ore to provide nothing but dividend food. The company is adding three new Wilfley tables to the mill, attention being centered upon a better saving as well as a greater amount of treated rock. The May Day company is working between fifty and sixty men at present.

#### ELY RESURRECTION. Company to Secure Modern Equipment For Ely Possessions.

Manager Raymond of the Ely Resurrection company stated to The Tribune.
Thursday that the management was
now securing an equipment of machinery for the mine at Ely, and that the
machinery would permit deep work to
be done upon this Salt Lake organization's domains in the White Pine county copper camp. Regarding the Ely
Resurrection the Ely Expositor recently
stated:

stated:
Tom C. Corbett, one of the contractors on the Ely Resurrection holdings, in the northern end of the district, expects to encounter sulphides daily on the Annie mine, on which he and his associates have taken a contract to sink to a depth of 200 feet. The near approach to the sulphides is indicated by the formations that have been passed through, which are similar to the ore bodies found on proven properties a short distance away.

ties a short distance away
At a depth of 135 feet the contractors penetrated several feet of lowgrade copper ore, and water was struck for the first time at this point. The flow of water proved to be slug-gish, and has not interfered with workreached the 185-foot level, and has found the contact between the linestone and the porphyry. He is confident that this formation is simply a covering for the sulphides, which may be only a few feet below. The contact

covering for the sulphides, which may be only a few feet below. The contact will be finished by August I.

On the first of the month, George R. Resurrection properties, will visit Ely to approve the work of the contractors, and will arrange for further work on the holdings of his company in this vicinity.

## BACK FROM YERINGTON.

Freeman Morningstar Finds All in Fine Shape at Copper Camp.

Freeman Morningstar has refurned from a week's trip to Morningstar City and the Yerington copper camp. He is very enthusiastic over what he saw in the great camp in the way of pro-gress. It was seven weeks since he last visited the camp, and he says that there are three times as many hulldings there are three times as many buildings—both town and mine buildings—creeted during this time, as compared with any similar length of time since the tanno war founded. The sound of saw and hammer is in evidence on all sides. He states that the Truckee Power company has strung its wires to the Douglas and other mines, and the power is likely to be turned on at any time now, meaning everything for this copnow, meaning everything for this cop-per section of the Sagebrush State.

# ORE FROM GOOD SPRINGS IS RICH

Mountain Top Mine Giving Up Resources That Carry Fine Values.

CONTAINS LEAD AND HIGH ZINC VALUES

future for this one group of mining future for this one group of mining claims, and establish it as one of the most attractive in all Nevada, is the opinion of George Wilson, one of the first to reach Rosebud before the excitement. In fact, Mr. Wilson was the pioneer of the camp, and among his first possessions was the Brown Palace group, from first to last the main attraction of the camp. Associated with him were Messrs. Rook lidge and MacGregor, all three of whom still retain substantial interests in the company now owning the prop-Company Making Frequent Shipments of the Rock to Market.

That the Good Springs mining district of Nevada is capable of producing bonanza rock, and lots of it, is apparent from the character of ore that is being sent into the local market by The Brown Palace property was picked up by McDonald, Parkhurst and 'Bob' Montgomery, of Montgomery Shoshone fame, and considerable delay just one property, the Mountain Top Mining company's Good Springs group, Shoshone fame, and considerable delay intervened between the consummation of this supposedly quarter of a million dollar deal and active development work on the part of the new management. It was supposed that the magnificent showings, as far as the surface was concerned, somewhat staggered the new owners, and the fear must have been harbored that such values would hardly go down with depth. and this is merely one of the many that could be mentioned. The Mountain Top property is especially interesting at this time, for the reason that it has a lot of very rich ore in the local market, and the shipment was followed to Salt Lake by C. E. McCarthy, the general manager of this organization.

On Thursday, Mr. McCarthy, was not

of this organization.
On Thursday Mr. McCarthy was not willing to divulge the values of the present consignment, preferring to await the smelter returns, but he had with him an assay sheet of the past fifteen lots of ore that demonstrates the kind of ore now being found. The rock carries lead and zinc, and assays in lead as high as 75 per cent are shown, all running extremely high even though less than these figures. The zinc ores run as high as 45.2 per cent to the ton. Manager McCarthy states that shipments will be maintained from this property, the same being under the present ownership and operation of prominent Boston capitalists.

The ore is the result of tunnel work, the chutes occuring in planes succeed-

The ore is the result of tunnel work, the chutes occuring in planes succeeding one another in generous number and in large proportions. One winze, for instance, has a face form 8 to 9 feet, all ore; while the management has drifted both ways along the strike of chutes for one bundred feet. Mr. McCarthy states that between the planes or chutes are stringers leading the miners from one natural treasure vault to another, providing a very satisfactory index to the development plans. The Mountain Top property is a part of the former noted Campbell estate, and the present developments are entirely to the satisfaction of those are entirely to the satisfaction of those in charge, and the shipments are do-ing not a little to gain converts to the richness of the Good Springs section of

Nevada.

Mr. McCarthy has confidence in the
Results speak for Mr. McCarthy has confidence in the Good Springs camp. Results speak for themselves, and he can name over innumerable portions of the district where results of splendid merit are being obtained. The outside world hears very little regarding the camp and its great richness. Development work is being done on all sides, and shippers of rich rock are numerous. Strong capital is interested there, and there have been deals of magnitude consumhave been deals of magnitude coasum-mated for Good Springs ground that have never been given to the public for the reason that it is ore and depth wanted there and not notoriety. Mr. McCarthy looks for a series of results the present season that will remove all doubts of the future usefullness of the camp, and to this end the Mountain Top company is lending a generous

#### TUSCARORA MINES. Activity And Interesting Finds Are the Order of Business. Special to The Tribune.

TUSCARORA. Nev., July 25.—A contract for a 350 foot tunnel has just been let by the Nevada Hydraulic company. This will do away with a long and expensive flume, expensive to long and expensive flume, expensive to build and expensive to keep in repair. Modern hydraulic machinery has been purchased, and the plant is being rapidly put in shape for work. The company has just purchased the four adjoining claims of N. L. Johns. The purchase price is reported as \$15,000. Mr. Johns is an old-time prospector, and has gone back East to visit his son and see the sights. There is considerable stir about the offices of the Nevada Tuscarora mines the past few Nevada Tuscarora mines the past few days. Rumor has it that the officers and some of the prominent members of the company are on their way from New York on a visit of inspection to the Tuscarora mines. It is rumored that Patsey Clark of Spokane has pur-chased the Sierra Nevada property. From Cornucopia comes the news of From Cornucopia comes the news of the opening up of a large borax deposit valued at \$140 per ton. It is reported from Aura on good authority that the men on the Cube have opened a sixty foot dike that carries high values in gold; in fact a free milling proposition. This claim is on the mountain side, just above the north line of the town. The Big Four has opened up a second ore body in their long tunnel that is much richer than anything previously uncovered in this

#### NEW BROKERAGE FIRM. Prominent Salt Lake and Provo Brok-

thing previously uncovered in this bonanza mine. The new find is twenty inches wide and carries values of

ers Join Interests Thursday.

A new brokerage firm made its bow to the public on Thursday, the same being composed of prominent Salt Lake and Provo brokers who have established offices both in this city and at Provo. J. William Knight, son of Jesse Knight, is president of the company and the Provo, representative; Clark Whitney is vice-president and maneger of the Salt Lake end; H. C. Jex is sceretary and treasurer. W. L. Mangum and E. F. Allea complete the board of directors. The company is capitalized for \$50,000, fully paid, and from the sort of men composing the same, it should begin with a splendid business which the members will retain. ers Join Interests Thursday.

# MOHAWK-JUMBO VERY NEAR A DIVIDEND

Local Holders of Stock Are Looking for a Profit Distribution Soon.

Local stockholders in the MehawkJumbo Leasing company, and they are
extremely numerous, are expecting soon
to receive word that this organization
has posted a substantial dividend. The
company was formed a short time ago
to operate a lease upon one of the star
properties in the Goldfield section of
Nevada, and a great deal of the
treasury stock was quickly absorbed
in Salt Lake City and vicinity. The
company is the second or third inreest
shipper from the Goldfield district at
this time. It has held this distinction
for several months, and the character
of rock that has been sent into the
local market has compared with any
that heretofore has come from Goldfield.

While no official statement has been given out regarding the affairs of the company, it is thought that in the treasury there is a sum not less than \$200,000, all the result of ore shipments, and this has caused local stock-holders to anticipate an early carving of the meion. The property is capitalized for 600,000 shares, 500,000 of which are issued. The lease does not expire until well toward the first of the coming year, and during this time a splendid array of dividend food should be accumulated and distributed among those in interest. among those in interest.

The company spent a great deal of

money on development work before finding the bonanza rock that is now being shipped out. It is stated that fully \$40,000 was put into the main shaft before the coveted zone was reached. But that results have been ideal and be versived by the kind of ideal can be perceived by the kind of returns now being registered by the hustlers who are at the helm of the organization.

#### THE DEAD AWAKENING.

Boom in Tintic Has Resurrected Many Companies Long Idle.

Companies Long Idle.

Properties that few ever heard of before, and whose only attraction at present is the fact that they are somewhere within the Tintic district, are being brought to life as if by magic, new names being found on the active list with each day. This is one effect of the present boom in that Utah mining camp, when all that a company needs is a block of Tintic ground without any mineral showing to speak of to create an immediate interest in the same. Tintic is a magic name, and the boom that it is enjoying at present is deemed justly due her and her resources.

deemed justly due her and her resources.

There are innumerable groups of properties within sight of the present excitement zone that are being opened up, work being done for the first time in years. Many of these were the possessions of men or combinations of men whose individual or collective pocketbooks would not admit of active operation upon the same, nor could men of capital be enthused to any great extent. But the way has been paved for them and there are very few now who find any trouble in financing organizations destined to sound depths of any kind of a prospect. It begins to look as if work and depth is all that is needed to bring ore bodies to light, and there should be numerous groups raised from obscurity to prominence during the remaining months of the present the remaining months of the present

#### INYO COPPER ORE. Col. Wall's Nephew Has Making of Splendid Little Mine.

Col. E. A. Wall is in receipt of some nandsome samples of copper ore from a property in Inyo county, California, a property in Invo county, California, that was found by one of his nephews. Colonel Wall stated yesterday that he had sent L. A. Jeffs, the mining engineer, to the group for the purpose of making an examination of the same, who had reported that the prospects for a fine little mine were excellent. Mr. Jeffs brought back an average of four feet of red metal ore that assayed 6 per cent copper. The group saved 6 per cent copper. The group is within three miles of a railroad, and apparently will be heard from within the present year.

#### KNIGHT AT PARK CITY. Reported That Tintic Operator Secured Uintah Treasure Hill.

Rumor had it Thursday that Jesse Knight had secured the Uintah Treasure Hill property at Park City, and the stock of the company as a consequence was in demand yesterday for the first time in many months. The consideration for the deal has not been disclosed. The Uintah Treasure Hill property is that which created no end of interest last fall owing to some very fine ore developments, and under the leadership of Mr. Knight it is expected to become one of the active companies and active stocks on the local exchange. Should the report be true that Mr. Knight is the new owner of this property, the company will be listed on the exchange, as is the custom with all the Knight stocks. exchange, as is the custom with all the Knight stocks.

#### Mining Notes.

R. T. White, manager of the Balak-lala company, is in the city on company business. J. M Reynolds, manager of the Heela company of Beaver county, is in the city from the mine with a car

of good ore. Morse S. Duffield, the well-known mining engineer, returned to this city Thursday from a professional visit to Colorado mines.

George E. Gunn sailed from Seattle Wednesday evening for the Copper River section of Alaska to examine mines in which he is interested.

The United Mining Exploration company of Ely is reported formed by prominent interests to take over and operate a group of claims at Ely adjoining the Ely Resurrection group on the southwest. A. L. Emberson is president of the company, and J. C. Babbitt is manager. Active development work is expected to start at once.
